

ACCAP Webinar:we will start right at 10am AK time

Robert Doehl:2 attendees

TINA BUXBAUM:everyone hear ok?

TINA BUXBAUM:Thanks Robert

TINA BUXBAUM:<https://data.giss.nasa.gov/gistemp/animations/>

TINA BUXBAUM:<https://data.giss.nasa.gov/gistemp/maps/>

TINA BUXBAUM:please remember to mute. \*6 will mute if you don't have a mute button

Princess Johnson:will that impacts to subsistence chart be available for us to use with correct citations?

TINA BUXBAUM:Princess I will ask.

TINA BUXBAUM:and to be clear you mean the table with the different sources of info that Helen showed correct?

TINA BUXBAUM:the pdf of the slides (as well as the recording) can be found here - [https://accap.uaf.edu/subsistance\\_access](https://accap.uaf.edu/subsistance_access)

TINA BUXBAUM:<https://www.leonetwork.org/en/>

TINA BUXBAUM:<https://www.snap.uaf.edu/>

Carl Wassilie:How would you include increased industrial activities on a 'condition' that has consequences of environmental disturbances on ecosystem servies?

Christine Brummer:Can you provide a breakdown of how many people participated from the communities?

Dr. Steve Konkel:LEO & TEK great assets to build "western science" and characterizations of adaptation & mitigation options. What are the major policy drivers that the team has identified? How do we connect the pilot with these communities to efforts at country-level, such as the Arctic Council? Are bridges being built with the Finniish leadership? Collaboration model across AK agencies? thnx

Sheila Dufford:Are there any plans to use GPS locations with multi-year imagery measure the scale of changes in these areas?

Karin Bodony:Are the study participants continuing their observations through other programs such as LEO?

Rebecca Van Wyck:What was the reasoning for making erosion and sedimentation seperate categories - rather than a soil conditions category?

Christine Brummer:Each

Rebecca Van Wyck:Could you describe incentives used for participant recruitment?

Sarah Trainor:AdapptAlaska: <http://adapptalaska.org/> is another venue for communities to share observations and adaptation information

Erica Mitchell>Hello - I help coordiante the LEO Network at ANTHC. I am very interested in following up after the webinar.

Ryan Toohey:Was there any discussion on how this information might be used for TC grant applications? or climate adaptation plans?

TINA BUXBAUM:This is Helen's email - [hscold@alaska.edu](mailto:hscold@alaska.edu)

Peter Kirchner:I am working on remote sensing of rain on snow and intersted in following up later

Christine Brummer:Thank You! :)
